About This Game

Tight controls and a smooth learning curve will have you knocking it out of the park in no time in this awesome arcade baseball simulator. Polygon's 2014 Sports Game of the Year.

Features:

- **Realistic Simulation and Physics:** Don't be fooled by the light-hearted/comical presentation; the fundamentals of baseball are well represented and if someone isn't familiar with the rules, they will be after playing Super Mega Baseball.
- **Groundbreaking Difficulty System:** Super Mega Baseball boasts an innovative difficulty control scheme called the Ego system. The Ego system offers a fine-grained control of difficulty on a per-user basis, which has been widely praised for leveling the playing field in cooperative and competitive modes. This system will push seasoned gamers to their limits while simultaneously providing a gentle introduction for beginners.
- **Up-to Four Player Local Co-op Play:** In addition to solo play, players can try their hand at head-to-head, 2v1, 2v2 and co-op against the CPU. In co-op mode, teammates alternate batting/running each time at-bat, and alternate pitching/fielding each inning, meaning ballplayers need to be on their toes every play. To even games, players can use the Ego system to set up a competitive game between friends of any skill level.
- **Ultra Responsive and Blazing Fast Gameplay:** Controls are easy to learn, but players will need to master jumping, diving, wall-catches, power-swings and cut-off plays to properly dominate friends. Short load times and a streamlined interface means most of the time is spent in the action, with nine-inning games taking around 20 minutes to play.

-
- **Full Batting and Pitching Statistics:** Most baseball statistics imaginable are available and ballplayers can use these to show off their MVP-quality skills.
 - **Leveling System:** Players tally up Starpoints for hits, strikeouts and catches during each game and Level Up once they collect enough points. Players can hire staff to train and coach their squad, improving skill attributes such as Power and Speed. Use that jacked up team to win at higher difficulties (and post higher leaderboard scores than friends)!
 - **Player Customization:** Customize the look and names of a team's players to create a ragtag crew of family and friends. Make as many aesthetic adjustments as you can imagine!

Nauseating level design and some very frustrating jumps spoil what is a beautiful and trippy environment to race in. In the other hand, it's still in development, so right now there's some features you could miss from other packages. I highly recommend Black Ink to anyone who wants to try something new and is willing to learn how to create brushes.. well.....if youre having trouble getting it to work quit your game ans open it again i hope you find this helpful for all the dlc. Garbage. Finished it just to say I did.. I have been playing Trackmania Nations, United, Canyon and Stadium since mid 2007 and probably spent just around 8.000 hours in total. Yes, 8.000. And I do not regret this at all.

Trackmania is the best online racing game out there and has the by far best community of any online game I ever played. Nobody is toxic, there is no open hate towards anyone. Why? Because of its concept. Theoretically, anyone can drive a world record. There is no such thing as pay2win, no feature that allows you to improve your car. Everyone has the same initial position.

The wide range of playstyle (mini maps, tech, fullspeed, dirt, speed fun...) allows everyone to find their preferred kind of maps. You find a nice server and you come back there. So do other people. You eventually get to know them.

Too bad this game never really defended its position in e-sports as it is easy to understand and still very exciting. But hey, TM is for the fun!

Games is pretty neat. Especially with friends. It's mario party for adults. Complete with betrayal distrust and lies you expect from your real life friends. ... Viki Spotter is a quite random game series from "for Kids Games" of simple flash graphics "spot the difference". The screen is split into half horizontally or vertically. You have to find other colorized or removed objects and point them out in the upper screen. An infinite hint function helps you if you get into any trouble. Mostly you play like 24 levels. 1 Level complete means earn 1 achievement. The games are usually overpriced with 2 EUR for just half an hour gameplay. So just wait for all parts getting just 0.39 EUR. The soundtrack is quite nervewracking so just switch it off.

Viki Spotter: Megapolis - Erased Skyscrapers, missing windows and trees and some kids in concrete wastelands. Insane amount of glitches, awful controls, terrible voice acting. 3/10. Good downloadable content.. Its a luck based puzzle game. Its neat and its playable. The puzzles are based off of luck because the 3D cubes go where ever they want. In my opinion it seems very bland to other puzzle games and it feels like i've played it 100 times before. I personally don't think its worth 3\$ at least right now. If you really want to play it get on sale or on a coupon.. Developer was very fast to respond to a forum post about a bug that the game launched with, and he put a patch to fix it about one hour later. The game itself was fast (40 mins), but enjoyable!. nice game. great music, design, levels etc. if u like rat attack.... u will like this. 10/10 very fun rhythm game

coming from a player that playsosu! on daily basis (didnt really play mania much tho), the gameplay for this game is stunningly beautiful. the classic theme is uhh, pretty normal i guess but the default themes for each song is just awesome. too bad i cant immerse fully on one of the themes due to fps drop (the Nekopara OP one to be exact)

keep up the good work and I'm hoping for more music content in the future :D
